Around 86% of the environmental impact from GHG emissions is from our extended value chain. The main contributing categories are purchased goods and services, business travel and employee commute. We estimate that approximately 50% of suppliers by value of business would be assessed for environmental impact - across key categories of IT hardware, facility management services and Civil. The natural capital valuation program assesses the environmental impact of our value chain activities, including purchased goods and services. This is based on our spend data for each supplier and categories they belong to. Details of the same are provided in Annual Report under Wipro's Natural Capital Valuation Program. We engaged with 130 suppliers, who contributed to more than 60% of carbon emissions impacts through Carbon Disclosure Project (**"CDP"**) Supply Chain Program and the Wipro Initiative for Supplier Engagement (**"WISE"**) program.
